Self Definition

I'm easy going and patient. I have plenty of experience working within a team towards a common goal thanks to my hobbies since early teenage years (football, basketball, team based esports games). I like to help others but not afraid to ask for help either. I have a strong affinity towards everything IT, spend a lot of my time keeping up with news in the industry.

Strength

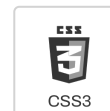

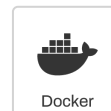

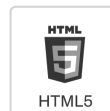

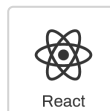

I have experience with front- and backend development using C# and Javascript, working with React and ASP.Net. I have worked with Entity Framework and databases, Identity core, as well as GitHub, Docker and GitHub Actions.

Mentor Opinion

"Zoltán has a solution-focused mindset, never losing sight of the goals he set for himself. Getting things done on time is a must for him, because he balances his academic and his Codecooler life simultaneously. His perseverance is commendable."

— Kornél Regius, mentor

Hard Skills

Recent Projects

REMOTIVATE

<https://github.com/Lukacs93/remote-work-management-tool>

Remotivate is a remote work management tool, similar to GitHub and Google Workspace. The main features include tracking projects and tasks, assigning members to them, and creating analytics. The site was developed using React frontend, .Net backend using Entity Framework and Identity Core, and was made by a group of 3.

PORTFOLIO

<https://github.com/ZozoTzM/Portfolio>

This is a simple portfolio site made entirely in React with Javascript. Uses Tailwind CSS.

COHOTEL

<https://github.com/ZozoTzM/CoHotel>

CoHotel is an internal app made to track reservations for a Hotel. It uses React frontend with Asp.Net backend.
